

PALLAVI TIWARI

B.Tech CSE Student (2027) | Python · Machine Learning | Open to Internships & Fresher Roles
+91 7456965928 | pallavi.gla_cs23@gla.ac.in | github.com/Pallavi-2878 | <https://www.linkedin.com/in/pallavi-tiwari-8409632b0/> | Kasganj, UP

PROFESSIONAL SUMMARY

Motivated Computer Science Engineering student at GLA University (Class of 2027) with hands-on experience building AI/ML solutions and frontend interfaces. Developed an AI-powered credit scoring platform at a national hackathon and led a machine learning brain stroke detection project. Seeking an internship or fresher role in machine learning, or software development where I can contribute and grow.

EDUCATION

B.Tech in Computer Science Engineering

Expected June 2027

GLA University, Mathura | CGPA: 6.4 / 10

Relevant Coursework: Data Structures, Database Management Systems, Machine Learning, Statistics, Python Programming, Object-Oriented Programming

Intermediate (Class XII)

May 2022

S.T.D.M Inter College, Soron | 74%

High School (Class X)

May 2020

S.T.D.M Inter College, Soron | 72%

PROJECTS

Vyapar Score — AI Credit Scoring Platform

March 2026

AI Hackathon Project | Team of 3 | Tech: Python · Scikit-learn · Pandas · HTML · CSS · JavaScript

- Built an AI-based credit scoring platform to help small shopkeepers and unbanked users access loan opportunities without formal financial records
- Developed ML classification model to generate credit scores for 500+ potential users using alternative financial data inputs
- Designed and implemented the frontend UI/UX using HTML, CSS, and JavaScript; improved user onboarding flow across 3 key screens
- Collaborated in an agile team of 3 members, contributing to project planning, frontend development, and model integration

Brain Stroke Detection System

Aug 2025 – Nov 2025

Academic ML Project | GLA University, Mathura | Tech: Python · Scikit-learn · Pandas · NumPy

- Built a binary classification model for early brain stroke detection using Machine Learning techniques on clinical dataset
- Performed exploratory data analysis and feature engineering on stroke-related medical data to improve model accuracy
- Led project planning, task coordination, and documentation for a team; delivered final model with measurable classification performance
- Analyzed stroke risk factors from structured data to support early detection and potential clinical decision-making

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL

Web Technologies: HTML, CSS, JavaScript

ML Libraries: Scikit-learn, NumPy, Pandas

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

Core Concepts: Machine Learning, Classification Models, Frontend Development

ACHIEVEMENTS & ACTIVITIES

- Participated in national-level **AI Hackathon (March 2026)**; built Vyapar Score, an AI credit scoring platform for unbanked small businesses
- Attended workshop on Artificial Intelligence concepts, tools, and emerging applications
- Attended seminar on Emerging Technologies in Computer Science
- Active GitHub profile with ML and web development projects: github.com/Pallavi-2878

PROFESSIONAL SKILLS

Analytical Thinking · Problem Solving · Team Collaboration · Communication · Adaptability · Project Coordination
